

Invitation to attend the side event:

OCEAN ACIDIFICATION – THE OTHER CO₂ PROBLEM

Ocean acidification is an emerging global concern and is a risk to marine biodiversity, ecosystems and human society. This event will highlight initiatives to address the challenges associated with ocean acidification, including the need for greater international observation and coordination.

A new international **Summary for Policymakers on Ocean Acidification** (IGBP, IOC- UNESCO and SCOR) and the results of the recent IPCC findings on ocean acidification will be presented at this event.

Date: 18 November 2013

Time: 13:15-14:45

Venue: COP 19; The National Stadium, Warsaw; Room Gdansk

Organizers: IOC-UNESCO, IAEA, PML, WMO, IMO, SCOR, IGBP

Programme

Moderator: David Osborn - Director Environment Laboratories; IAEA

Speakers: Dr Carol Turley - Senior Research Scientist; Plymouth Marine Laboratory

Dr Richard Feely - Senior Research Scientist; NOAA/PMEL

Lauren Linsmayer - PhD. Student; Scripps Institution of Oceanography

Astrid Dispert - Marine Environment Division; IMO

Dr Jorge Luis Valdés - Head of Ocean Science Section; IOC-UNESCO

Followed by an open discussion
